

EB-C4

Welcome to EBM Medical. We provide high quality active pharmaceutical ingredients, supported by evidence based medicine and available exclusively through your health care provider. Your healthcare provider has prescribed EB-C4 – a high concentration broad spectrum, transdermal CBD cream.

Sometimes called the “whole-plant” or “entourage effect,” EB-C4 offers a complex biochemical matrix of ingredients, which work together to help achieve relief.¹

EB-C4

Cannabidiol (0% THC)	3%
Myrcene	3%
Beta-Caryophyllene	3%
Arnica	2%
MSM (Methylsulfonylmethane) ...	2%

Dosage:

Apply 1-4 times per day or as advised by your healthcare provider.

Formulated and produced by licensed pharmacists. USA hemp sourced CBD – vegan-friendly, organic ingredients.

Therapeutic Active Pharmaceutical Ingredient Guide²⁻¹³

ACTIVE INGREDIENT	DESCRIPTION
Cannabidiol (0% THC)	A key phytocannabinoid that acts on human cannabinoid receptors - Inflammation + Mood, Memory, Sleep
Myrcene	A key terpene that works with CBD to produce the entourage effect - Inflammation
Beta-Caryophyllene	A key terpene that works with CBD to produce the entourage effect - Inflammation + Mood
Arnica	A key herb with known medicinal properties. Most common ingredient in anti-inflammatory OTC topicals - Inflammation
MSM (Methylsulfonylmethane)	- Oxidative stress - Inflammation
Botanical Complex (Camphor-Peppermint-Eucalyptus-Menthol)	+ Cooling Effect
HRT Heavy™ Pharmaceutical Base	+ Tissue penetration + Systemic exposure

+ increase - decrease

Phone: 1-844-360-4095
Email: support@EBMmedical.com
Website: EBMmedical.com

Now that I have been prescribed an EBM Medical product, what are the next steps?

1 Your provider will send your prescription to EBM Medical

2 You will receive a text or email to confirm your order —
To expedite your order, call us at 1-844-360-4095

3 An EBM representative will contact you to answer your questions and process your payment

4 Within 24 hours, your prescribed formula will be shipped to your door

5 You will receive a confirmation text 10 days before your prescription needs to be refilled

Questions?

Contact EBM at 1-844-360-4095, support@EBMmedical.com, or visit our website at www.EBMmedical.com

FREQUENTLY ASKED QUESTIONS

What is EB-C4?

EB-C4 is a broad spectrum transdermal cream, combined in an HRT HEAVY™ base, that drives the active ingredients into the tissue and bloodstream so they may provide benefits for the entire body. EB-C4 contains key active ingredients that are commonly used for relief, overall health, and wellness.

Will I get high from the CBD in EB-C4?

No. CBD is a phytocannabinoid that is non-psychoactive (it does not result in feelings of euphoria) and has a remarkable safety profile. EB-C4 is guaranteed to be THC FREE.

Is EB-C4 approved by the FDA?

The FDA has not evaluated EB-C4. Due to DSHEA guidelines, we cannot specifically state conditions CBD may affect. We encourage you to do your own research, consult with doctors, and use PubMed.gov as a resource as newly published research comes out in real-time. Anecdotal evidence and case reports are pushing the research needle forward, but more research is needed to provide structure and function claims associated with taking CBD.

Does EB-C4 need to be refrigerated?

No. EB-C4 has been formulated by licensed pharmacists to withstand separation of ingredients in high temperatures. If your shipment is received in a hot condition, simply place in the refrigerator for 15 minutes to return the consistency to a cream.

Drug Interactions: Do not take EB-C4 if you have any known allergies to its listed active pharmaceutical ingredients.

Manufactured in compliance with current Good Manufacturing Practices. [cGMP].
